where you were

Hey I Want That Back - page 2

1. I went down to the waterfront to take some time to spit you up
And think about how it all went down how I took you in how we rolled around

2. It's no secret I was needy you provided I got greedy
You smelled of wood smoke and dirty laundry I could not stand how you got to me
And hey I want that back

3. And what kept me from running south, your sleepy eyes your contented mouth
You left your hand print on my knee when we first kissed on your balcony
And hey I want that back

In the distance an eerie sound
Man in the window shade pulled completely down
Scream in the alley, slam of the door
The police come asking where you were

4. I covered for you, told them a lie, involved myself for your alibi
And all of that for just one more kiss I lean to you you clench your fist and
Hey I want that back

And now you're gone with no explanation
I'm desperate to find you desperate and shaken
I'm searching the cities I'm searching the towns
Three months later you were found

5. And you're alive but you barely show it and I'm still here I'm a fool I know it
I'll wake you up and I will throw you out I'll kick you good till you start to shout that
Hey you want that back 'cause
Hey I want that back
Hey I want that back
